

IN THE CLAIMS:

The text of all pending claims, (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~strikethrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

Please AMEND claims 1, 3, 4, 8, 10, 11, 12, 14 and 15, CANCEL claims 2, 6, 9, 13, and 16 and ADD new claims 17 and 18 in accordance with the following:

1. (CURRENTLY AMENDED) An information processing apparatus ~~for~~ processing information and performing a plural window displays on a display device, comprising:

a screen memory for the display device; and

a processing unit ~~for~~ outputting image data of ~~the~~ a specific window of the screen memory to an external monitor;

wherein said processing unit executes plural tasks being started, displays each window according to said plural tasks on said display device, and displays an external monitor output selection menu in a menu bar of each of the plural window displays, to select said specific window.

2. (CANCELLED)

3. (CURRENTLY AMENDED) The information processing apparatus according to claim 1, wherein said processing unit outputs ~~the~~ image data of ~~an~~ a single effective window selected to the external monitor among plural windows of the display device.

4. (CURRENTLY AMENDED) The information processing apparatus according to claim ~~2~~ 1, wherein said processing unit displays ~~a plural kind of~~ the selection menus of the external monitor output with a plurality of output modes in the menu bar of the window of the display device.

5. (ORIGINAL) The information processing apparatus according to claim 1, wherein said processing unit starts up a display application program for the output of said external monitor according to starting of an operating system.

6. (CANCELLED)

7. (ORIGINAL) The information processing apparatus according to claim 1, wherein said processing unit executes an application for reproducing an image.

8. (CURRENTLY AMENDED) A ~~display control method of~~ controlling a display device ~~an information processing apparatus for processing information and performing plural window displays on a display device,~~ comprising the steps of:

executing plural tasks to be started;

displaying plural windows of each of said tasks on said display device; and

outputting image data of a specific- ~~selected~~ window to an external monitor among said plural said windows;

wherein said displaying comprising displaying an external monitor output selection menu on a menu bar of each window of the display device.

9. (CANCELLED)

10. (CURRENTLY AMENDED) The ~~display control method of the information processing apparatus~~ according to claim 8, wherein said outputting step ~~comprises a step of~~ outputting the image data of an effective window to be selected by pointing to said selection menu to the external monitor among plural windows of the display device.

11. (CURRENTLY AMENDED) The ~~display control method of the information processing apparatus~~ according to claim 98, wherein said ~~display step~~ display displaying comprises a step of displaying a plural kind of the selection menus ~~of with a plurality of output modes~~ to said external monitor on the menu bar of the window of the display device.

12. (CURRENTLY AMENDED) The ~~display control method of the information processing apparatus~~ according to claim 8, further comprising a ~~step of~~ starting a display application program for the output of the external monitor according to starting of an operating system of the external monitor according to starting of ~~the an~~ information processing apparatus.

13. (CANCELLED)

14. (CURRENTLY AMENDED) The ~~display control method of the information processing apparatus~~ according to claim 8, wherein said display step displaying comprises a step of displaying a reproduction image on said window.

15. (CURRENTLY AMENDED) A computer-readable storage medium ~~stored~~storing a program ~~of an information processing apparatus for processing information and performing plural window displays on~~for a display device causing a computer to execute:

~~wherein said program make said information processing apparatus to search an window which should be outputted among plural windows displayed on the display device and to output image data of the searched window to an external monitor.~~

displaying plural windows of each executed tasks on said display device; and
outputting image data of a selected window to an external monitor among said plural windows.

wherein said displaying comprises displaying an external monitor output selection menu on a menu bar of each window of the display device.

16. (CANCELLED)

17. (NEW) The information processing apparatus according to claim 4, wherein said processing unit displays a plural kind of selection menus of the external monitor output to indicate an always output and an output when effective to said external monitor in the menu bar of the window of the display device.

18. (NEW) The method according to claim 11, wherein said displaying comprises displaying a plural kind of selection menus to indicate an always output and an output when effective to said external monitor on the menu bar of the window of the display device.
